

# What's it Like to Work on the Space Shuttle: The Misadventures of a Space Cadet

Gregory N. Cecil, M.A.S., a former Senior Aerocomposite Technician for the Space Shuttle Fleet, has an entertaining ½ hour presentation with a follow-up Q&A period describing his experiences working on the Space Shuttle Fleet from a technician's point of view.

The ***RV-103 Lecture Series*** was created to present to civic groups, schools (5th grade and up), colleges, and scout troops what it is like to be involved in and to work in Human Space Flight, specifically the Space Shuttle Program.

You can email Mr. Cecil at [Rocketman@RV-103.com](mailto:Rocketman@RV-103.com) for rates and more information.
